SpeakerCraft TV SPEAKER

...Exceed all your expectations, that is.

The slimmer flat-panel TVs get, the smaller the Speakers and the worse the sound.

Now there's a simple and powerful solution: SpeakerCraft's CS3 TV Speaker.

The CS3 is a one-piece sound system that fits right underneath a TV. Connect just one audio cable and a living room, bedroom or home office becomes a home theater.

Any Room With A TV Becomes A Home Theater.

Connects To Almost Anything. Hook it up to a TV, an MP3 player, a satellite radio tuner or whatever you've got.

With two built-in subwoofers, 80 watts of digital amplification and simulated surround sound, the CS3 delivers a truly compelling home theater experience.

Bluetooth® wireless technology turns the CS3 into the best smartphone sound system you've ever heard. With the music library on your iPhone®, iPad®, Android™ device or Tablet and you've got sound that absolutely blows away any speaker dock.

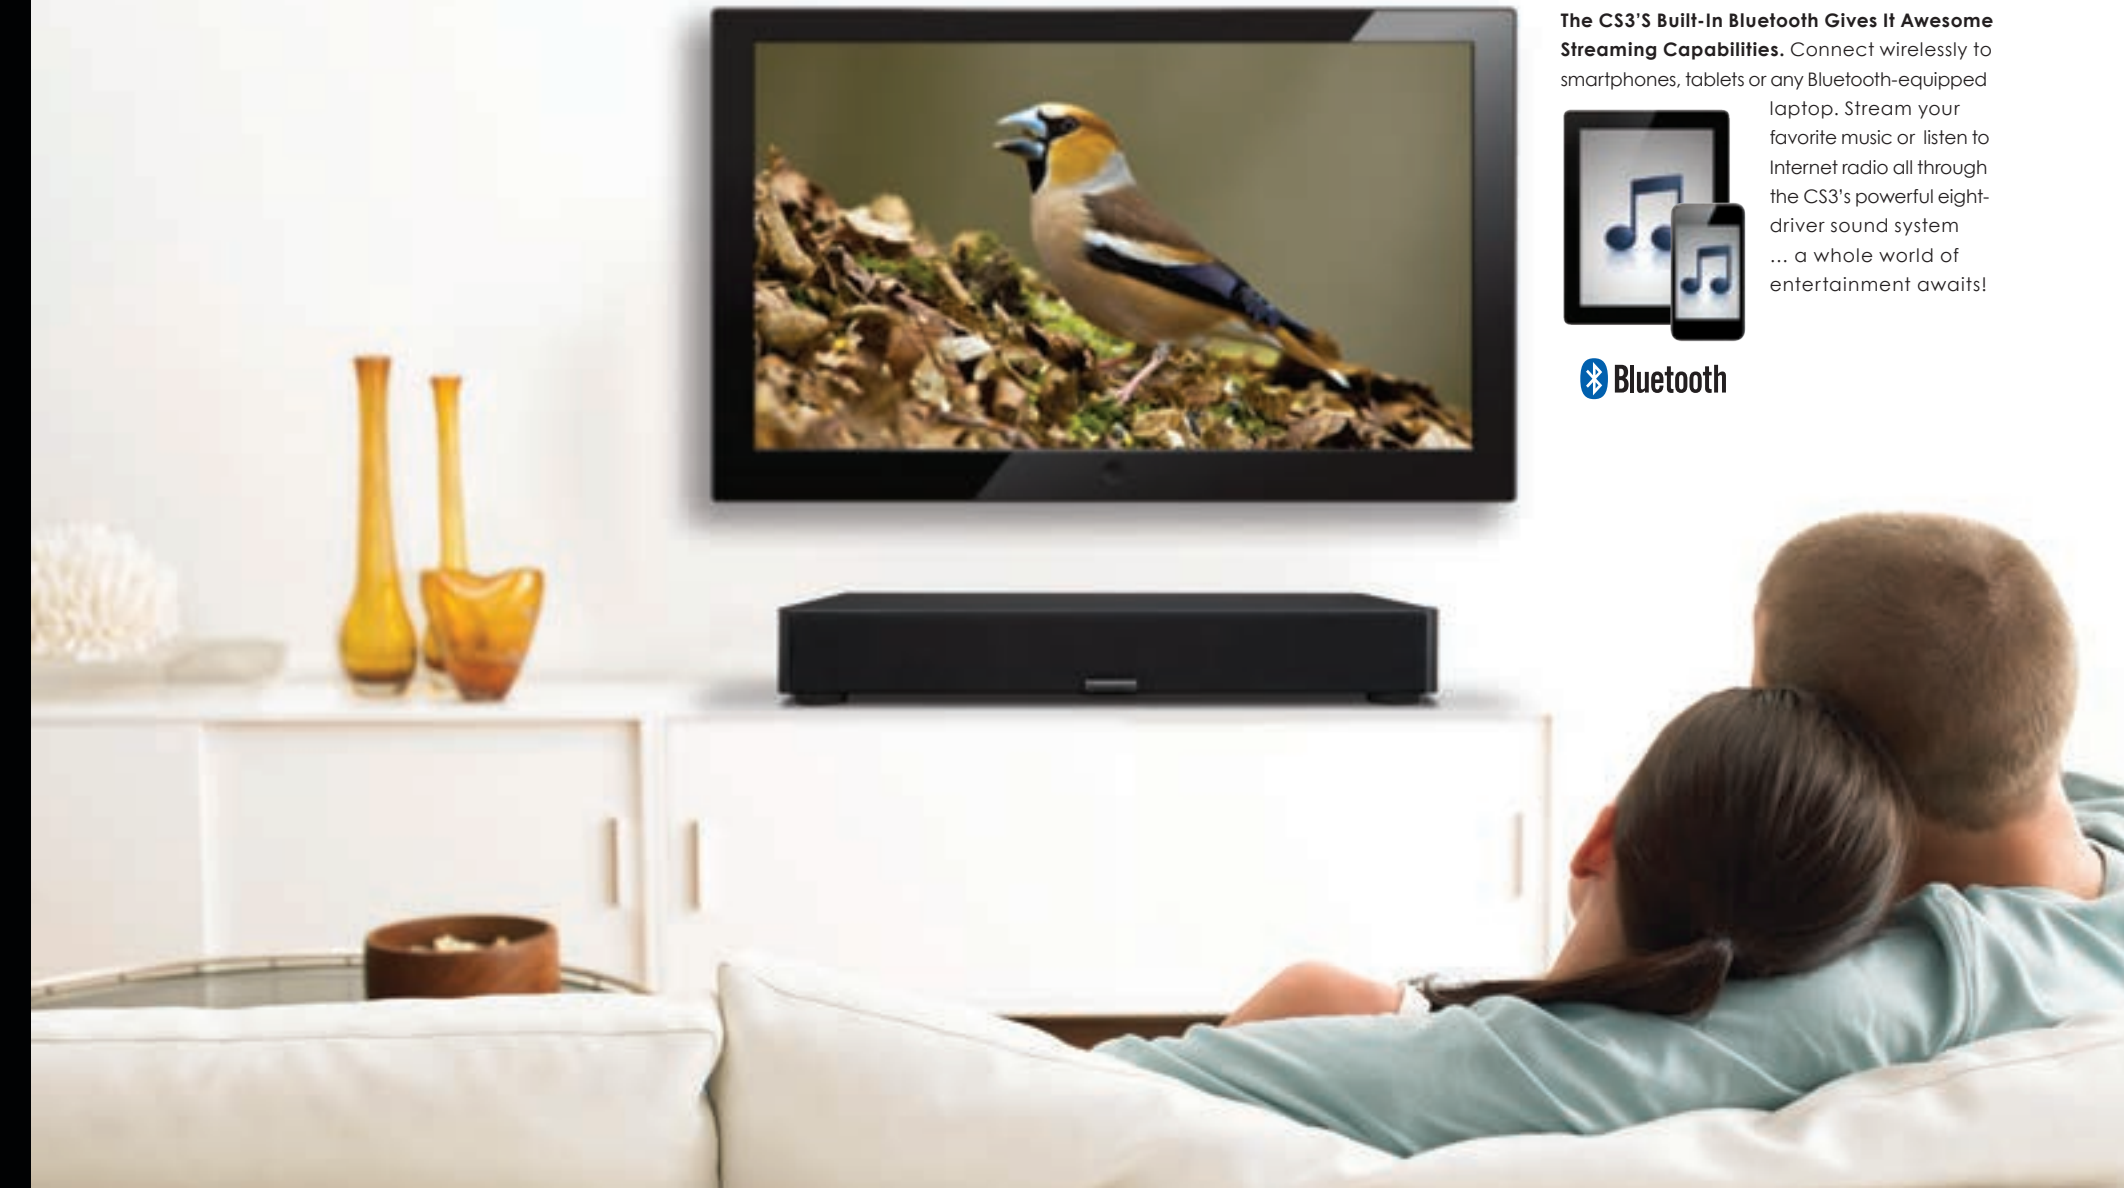

For many rooms, the CS3 is really all the sound system you need.

Superb SpeakerCraft Sound Engineering. We pack the CS3 with top-quality parts, all selected specifically to excel in the confines of the CS3's slim chassis.

You choose where it goes

There's never been a simpler and more effective way to get better sound from a TV. The SpeakerCraft CS3 TV Speaker is simply one of the most elegant and user-friendly sound systems ever designed.

The CS3's Built-In Bluetooth Gives It Awesome Streaming Capabilities. Connect wirelessly to smartphones, tablets or any Bluetooth-equipped laptop. Stream your favorite music or listen to Internet radio all through the CS3's powerful eight-driver sound system ... a whole world of entertainment awaits!
